JOURNAL OF MOLECULAR STRUCTURE, VOLUME 194 (1989)

SUBJECT INDEX

N-Acetyl-β-D-glucosamine,
conformational studies of bacterial peptidoglycan: structure and stereochemistry of *N*-acetyl-β-D-glucosamine and *N*-acetyl-β-D-muramic acid 19
Addition compounds,
a study of the electronic structures of *n*-*v* addition compounds of BH_3 by a combined use of UPS and EELS 163
Allene oxide,
photolysis of allene–ozone mixtures at 647 nm in cryogenic matrices. Part 1. Formation of allene oxide 215
Allene–ozone mixtures,
photolysis of allene–ozone mixtures at 647 nm in cryogenic matrices. Part 1. Formation of allene oxide 215
Amides,
ab-initio calculations on the protonation of simple amides by H_3O^+. Effects of discrete hydration and solvent cavity 191
Arabinose-binding,
computer simulation of protein–carbohydrate complexes: application to arabinose-binding protein and pea lectin 203

Bacterial peptidoglycan,
Conformational studies of bacterial peptidoglycan: structure and stereochemistry of *N*-acetyl-β-D-glucosamine and *N*-acetyl-β-D-muramic acid 19
Bacteriorhodopsin,
an ab-initio study of the proton affinity of conjugated Schiff-base and related nitrogen compounds: an analysis of the triggering site of bacteriorhodopsin 61
BH_3,
a study of the electronic structures of *n*-*v* addition compounds of BH_3 by a combined use of UPS and EELS 163
Bipyridines,
Raman spectroscopic studies of substituted bipyridines, their ruthenium(II) complexes and surface-derivatized TiO_2 107

Br^- ions,
Raman spectral studies on interactions of Br^- ions with CD_3 group of acetonitrile, nitromethane and dimethyl sulfoxide 73

Carbon monoxide,
ab initio study of interactions between methanol and nitrogen or carbon monoxide 45
Carbonyl,
geometry changes induced by negative hyperconjugative interactions involving carbonyl and thiocarbonyl groups 135
CD_3 group,
Raman spectral studies on interactions of Br^- ions with CD_3 group of acetonitrile, nitromethane and dimethyl sulfoxide 73
CH_4,
calculations for CH_4 in a tetrahedral site in an Xe matrix 83
3-Chloropropene,
conformational analysis from low-frequency vibrational data and ab initio calculations for 3-chloropropene 259
Conjugated organic molecules,
effects of electron correlations in conjugated organic molecules and solids 149
Cyclic $H_4A_2X_2$ (A=C,Si; X=O,S,CH_2),
theoretical studies on the stabilities of 1,2- and 1,3- isomers of cyclic $H_4A_2X_2$ (A=C,Si; X=O,S,CH_2): the anomeric effect at silicon 183

Dipolar solvation dynamics,
on the generalized continuum model of dipolar solvation dynamics 171

Generalized continuum model,
on the generalized continuum model of dipolar solvation dynamics 171
Germanium,
molecular mechanics calculations (MM2) on organometallanes of germanium, tin, and lead 1

H_3O^+,
ab-initio calculations on the protonation of simple amides by H_3O^+. Effects of discrete hydration and solvent cavity 191
1,3,5-Hexatriene,
structural studies and vibrational analyses of stable and less stable conformers of 1,3,5-hexatriene based on ab initio MO calculations 279
Hydrogen-bonded systems,
on the reliability of SCF ab initio calculations of vibrational frequencies and intensities of hydrogen-bonded systems 89

Laser absorption,
infrared diode laser absorption study of free jets of NH_3 117
Lead,
molecular mechanics calculations (MM2) on organometallanes of germanium, tin, and lead 1

Methanol,
ab initio study of interactions between methanol and nitrogen or carbon monoxide 45
Methylhydrazine,
inversion and torsional motions of methylhydrazine studied by microwave and far-infrared spectroscopy and ab initio calculation 301

NH_3,
infrared diode laser absorption study of free jets of NH_3 117
Nitrogen,
ab initio study of interactions between methanol and nitrogen or carbon monoxide 45
Nucleic acid bases,
tautomerism of nucleic acid bases and the effect of molecular interactions on tautomeric equilibria 239

Oligonucleotides,
computer simulation of the cross peak patterns in NOESY spectra of oligonucleotides: an aid to accurate structure determination in aqueous solution 33
Organometallanes,
molecular mechanics calculations (MM2) on organometallanes of germanium, tin, and lead 1

Pea lectin,
computer simulation of protein–carbohydrate complexes: application to arabinose-binding protein and pea lectin 203
Protein–carbohydrate complexes
computer simulation of protein–carbohydrate complexes: application to arabinose-binding protein and pea lectin 203

Ruthenium(II),
Raman spectroscopic studies of substituted bipyridines, their ruthenium(II) complexes and surface-derivatized TiO_2 107

SCF ab initio calculations,
on the reliability of SCF ab initio calculations of vibrational frequencies and intensities of hydrogen-bonded systems 89
Schiff-base,
an ab-initio study of the proton affinity of conjugated Schiff-base and related nitrogen compounds: an analysis of the triggering site of bacteriorhodopsin 61
Silicon,
theoretical studies on the stabilities of 1,2- and 1,3- isomers of cyclic $H_4A_2X_2$ ($A=C,Si$; $X=O,S,CH_2$): the anomeric effect at silicon 183

Thiocarbonyl groups,
geometry changes induced by negative hyperconjugative interactions involving carbonyl and thiocarbonyl groups 135
Tin,
molecular mechanics calculations (MM2) on organometallanes of germanium, tin, and lead 1
TiO_2,
Raman spectroscopic studies of substituted bipyridines, their ruthenium(II) complexes and surface-derivatized TiO_2 107

Xe matrix,
calculations for CH_4 in a tetrahedral site in an Xe matrix 83
